Education

Chitkara University, Punjab

B.E. Computer Science Engineering

2022 – Aug 2026

CGPA: 9.06

Scholars Rosary Sr. Sec. School

Class XII: 93.6% Class X: 94.6%

Work Experience

Software Development Engineer Intern

CreateBytes

Sep 2025 – Present

Gurgaon, India

Luxe Fitness – Gym Fitness Platform (Bristol City Center, Bedminster, Birmingham)

Live Client

- Architected and implemented end-to-end **backend modules for payment processing, membership onboarding, and subscription scheduling** using **Node.js** and **MongoDB**, directly impacting revenue operations across 3 gym locations.
- Built and maintained the CMS frontend enabling gym staff to manage memberships and schedules.
- Improved **Core Web Vitals scores (LCP, FID, CLS)** for the public website, boosting SEO performance and user experience.
- Integrated a structured logging system for API monitoring, enabling proactive error detection and faster debugging in production.
- Served as primary technical liaison for the client, conducting feature walkthroughs, resolving production bugs, and translating business requirements into engineering tasks.

Krigat – AI Powered Motion Tracking Platform

Live Client

- Developed the admin panel backend services using **NestJS** and frontend modules for an AI motion-tracking application enabling real-time fitness analysis.
- Implemented video capture, movement recording review, and exercise tracking on the **React Native** application.
- Won **1st Place Overall at Supernova AI MEA, Cairo (AI Everything Egypt 2026)**.

RedPill Verify – Condition-Based Transaction / Escrow Platform

Live Client

- Built the complete backend from scratch using **NestJS**, including OTP-based authentication, role-based access control, deal creation flows, and proposal management.
- Developed in-app notification systems and integrated third-party services and machine learning models into backend APIs.
- Delivered secure buyer-seller transaction workflows with conditional release logic while resolving production edge cases.

CBExperts – AI Lead Generation & Workshop Platform

Internal Project

- Built an end-to-end **multi-agent AI outreach pipeline** (scouting, research, strategy, drafting, Gmail sending, reply handling), validated on Apollo lead data.
- Co-led the first paid workshop with the CEO, delivering the live demo, technical guide, and workflow documentation.

CB-Extensions – Attendance & Task Logging Extension

Internal Project

- Built an extension for CB-Workspace to streamline attendance management and daily task logging for the team.

CB-Campaigns – Marketing Landing Pages

Internal Project

- Developed four mobile-responsive landing pages (HealthTech UK/US, FinTech UK/US) end to end on the frontend.

Cross-Project Contributions

- Implemented automated end-to-end test suites using **Selenium**, reducing regression risk and improving release confidence.
- Managed deployments manually and through **GitHub Actions CI/CD pipelines**, ensuring consistent and repeatable release processes.

Technical Skills

Languages

JavaScript (ES6+), TypeScript, Java, C++, Python

Frontend

React.js, Next.js, HTML5, CSS3, Responsive UI, Core Web Vitals Optimization

Backend

Node.js, NestJS, Express.js, RESTful APIs, OTP Authentication, Role-Based Access Control

Databases

MongoDB, PostgreSQL, MySQL, Firebase

Testing & QA

Selenium (E2E Automation), Postman, API Testing

DevOps & Tools

Git, GitHub, **GitHub Actions**, **CI/CD Pipelines**, AWS (Basics), Logging Systems

Core CS

Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, System Design (Basics)

Personal Projects

- Portfolio:** Full Stack project built with NestJs and NextJs for showcasing my achievements, journey and growth over time.

Research, Certifications & Achievements

- Research Paper:** “Security and Governance Framework for Generative AI in Healthcare” (2025) – Proposed a security and governance model for responsible GenAI deployment in clinical environments.
- Research Paper:** “The Rise of AI in Healthcare” – Analytical study of AI’s impact on clinical and diagnostic workflows.
- Certifications:** Python & CSS (HackerRank, Coding Ninjas); Generative AI & ChatGPT (GeeksforGeeks).
- Hackathons:** Flipkart GRID 6.0 (Qualified Round 1), Medecro HealthHack 2024 (Prototype Round).
- Competitive Programming:** Solved 300+ DSA problems across LeetCode, GeeksforGeeks, and Coding Ninjas.
